

My Ideas to Tackle Global Warming

Look at each problem and note down some ideas that you could do in your own house as well as what could be done at a national and international level.

Cows making methane	Palm oil deforestation	Fossil fuels for energy	Pollution from cars and factories	Oil used for plastics
I could:	I could:	I could:	I could:	I could:
The Government could:	The Government could:	The Government could:	The Government could:	The Government could:
The world could:	The world could:	The world could:	The world could:	The world could:
