

Important Vocabulary

A point		is any particular spot.
A ray		has a starting point but no end point.
A line		goes on forever in both directions.
A line segment		is a part of a line with a starting point and a stopping point.

Types of Lines

Intersecting lines		are lines that cross but do not make a right angle.
Perpendicular lines		would form a 90° angle if they crossed.
Parallel lines		would never touch, even if they went on forever.
