

1)

	Rectangle	Square	Rhombus	Kite	Parallelogram	Trapezium
Four sides	A	A	A	A	A	A
Four vertices	A	A	A	A	A	A
Two pairs of parallel sides	A	A	A	N	A	N
Two pairs of congruent sides	A	A	A	A	A	N
Opposite angles are equal	A	A	A	S	A	N
One pair of parallel sides	N	N	N	N	N	A
Adjacent sides are equal	S	A	A	A	S	S

The sum of the interior angles of all quadrilaterals is 360° .

2) Samira is correct. We can use the information give to deduce the missing angles.

- 1) The lengths of the lines do not make any difference to the size of the angles.
 2) A rectangle with sides of 6cm and 9cm and four right angles. Accept any correct answer.
